PROFESSIONAL SUMMARY

Computer Science graduate with internship experience in React.js and hands-on experience building responsive web applications and REST APIs using JavaScript, Node.js, Express.js, and PostgreSQL. Strong foundation in frontend development, backend integration, Git/GitHub, and data structures, with 400+ LeetCode problems solved.

WORK EXPERIENCE

RK International School – TGT Computer Teacher April 2026 – Sep 2026

- Taught Computer Science to Classes 6–8, covering core programming concepts, databases, MS Office, and web technologies.
- Designed and delivered structured lesson plans, assignments, assessments, and practical hands-on activities.
- Simplified complex technical concepts through practical demonstrations to strengthen conceptual understanding.
- Managed classroom activities, evaluated student performance, and maintained an interactive learning environment.

Soouls – Web Development Intern Oct 2025 – Mar 2026

- Developed **10+ responsive and reusable UI components** using React.js, JavaScript, HTML5, CSS, and Tailwind CSS.
- Integrated REST APIs using Axios and managed API responses and application state.
- Built responsive interfaces using component-based architecture and reusable UI patterns.
- Collaborated with backend developers to integrate frontend and backend functionality.
- Debugged UI and API integration issues and performed testing to improve application reliability.
- Used Git and GitHub for version control, code management, and collaborative development.

PROJECTS

Finance Management Backend [Link]

Tech Stack: Node.js, Express.js, PostgreSQL, Supabase , JWT

- Developed **7+ RESTful backend APIs** for a finance management application with secure authentication and **role-based access control.**
- Implemented **JWT-based authentication** and authorization for protected API endpoints.
- Developed CRUD APIs for managing finance-related data.
- Built dashboard APIs to provide structured financial data for frontend consumption.
- Integrated PostgreSQL using Supabase for persistent data storage and management.

SyAi – AI Productivity Platform [Link]

Tech Stack: Kotlin, Jetpack Compose, Firebase, REST API

- Developed an AI-powered productivity platform integrating **OpenAI APIs**, and Firebase for intelligent note taking, task management, and multimedia workflows.
- Designed a modular offline-first architecture using MVVM and Clean Architecture while integrating Hugging Face, NumPy, and Pandas for AI-powered features.
- Implemented **cloud synchronization**, and REST APIs using Firebase Authentication, Firestore, and Cloud Messaging.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, Kotlin,
Backend & Databases: Node.js, Express.js, PostgreSQL, SQL, Firebase, MySQL, Supabase
Front-end & Web Technologies: HTML5, CSS3, JavaScript, React.js, Tailwind CSS
Version Control: Git, GitHub,
Development and Testing Tools: Android Studio, Figma(basic). Postman
Methodologies & Frameworks: MVC and MVVM Architecture, REST API

EDUCATION

B.Tech – Computer Science & Engineering | SRM University, Haryana CGPA: 8.1/10 || 2022-2026

ACHIEVEMENTS & CERTIFICATIONS

- Solved 400+ Data Structures & Algorithms problems on LeetCode.
- Participated in HackJMI Hackathon (Feb 2025), SRM Builds (Nov 2024).
- Participated in tech events named Code Auction, MindSync Coding event.
- Attended a Blockchain and App Development workshop by SRM University.
- Python Course completion certification – GeeksForGeeks
- Generative AI Fundamentals – Guvi
